

Caustic Soda Flakes Specifications & Test

Product Description

Soda caustic is a silk-like substance, white in color, very moisture absorbing and generates a great deal of heat when dissolved in water.

Physical Properties

Color: White

State: Solid Flakes

Following is the chemical analysis of solid caustic soda:

NaOH	Min 98–99%
NaCl	Max 100 PPM
NaClO ₃	Max 70 PPM
Ca ⁺⁺ Mg ⁺⁺	Max 0.3 PPM
Na ₂ CO ₃	Max 0.4 %
Hg ⁺⁺	NIL

Applications

Paper industries, Detergents, Soap, Textile Industries, Oils (vegetable, liquid, olive), food industries, leather, fertilizers, glass, mineral products, metal plating, (aluminum, copper...), petroleum Industries (drilling, installations, repairs, etc.), rubber production, glue production and sugar, among others.

Packing

In polyethylene and polypropylene double-walled bags weighing 25 kg.

Safety Note
